

## Automatic Shrink Wrapping Machine

### Model: V'A1

The VM Pack Automatic Shrink Packaging Machine is designed for seamless integration into industrial production lines. Operating with polyethylene (PE) shrink film, this model features a space saving, ergonomic design ideal for modern manufacturing environments. The color touch screen operator panel offers a user friendly interface, allowing settings to be adjusted quickly and easily.

The automatic shrink packing machine is designed to make shrink film replacement quick and effortless. Product transfer within the shrink tunnel is carried out using silicone coated steel rollers. We offer customized models to accommodate products of various sizes and shapes. For detailed technical information, model selection, or pricing inquiries, please contact us.

Feature	Description
<b>Color Touch Screen Control Panel</b>	User friendly interface allows for quick and easy adjustment of the machine settings.
<b>Automatic Product Length Detection</b>	Automatically detects product length for seamless packaging.
<b>Product Counter</b>	Counts the total number of packages produced during operation.
<b>Motorized Film Unwinding</b>	Automatically unwinds the shrink film from the roll during operation. Speed is adjustable via drive control.
<b>Machine Material</b>	The machine body is manufactured from steel construction and protected with electrostatic powder coating.

<b>Warranty</b>	1-year warranty, with 5-year spare parts availability.
<b>CE Compliance</b>	The machine is equipped with mechanical and electrical safety measures in accordance with CE directives.
<b>Max. Product Dimensions</b>	Width: 500 mm, Length: 500, Height: 300 mm
<b>Max. Speed</b>	12 packs/minute
<b>Packaging Material</b>	Polyethylene (PE) shrink film 35–100 microns
<b>Max. Roll Width</b>	700 mm
<b>Air Pressure</b>	6 Bar
<b>Voltage</b>	380V, 50/60Hz
